

SEENIVASAN R

Aspiring Data Analyst | SQL | Python | Power BI

Madurai, Tamil Nadu • +91 63742 74791 • iseenivasanr@gmail.com

LinkedIn • GitHub • LeetCode

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student with hands-on experience in SQL, Python, Power BI, Advanced Excel, and Data Warehousing. Skilled in data wrangling, cleaning, and analyzing data from databases and spreadsheets, dashboard development, and exploratory data analysis (EDA) to transform large datasets into actionable insights and support data-driven decision making.

TECHNICAL SKILLS

Programming	SQL (SELECT, JOINS, GROUP BY, Window Functions) • Python • C
Python Libraries	Pandas • NumPy • Matplotlib • Jupyter Notebook
Data Analysis	Data Wrangling • EDA • Data Cleaning • Statistical Analysis • KPI Analysis • Data Visualization
Business Intelligence	Power BI • DAX • Power Query • Dashboard Development
Databases	MySQL • SQL Server
Data Engineering	ETL • Data Warehousing • Star Schema • Dimensional Modeling • Medallion Architecture
Advanced Excel	Pivot Tables • VLOOKUP • XLOOKUP • Basic Formulas
Tools & Cloud	Git • GitHub • VS Code • Microsoft Excel • AWS EC2

PROJECTS

SQL Data Warehouse & BI Analytics Platform May 2026 – July 2026

SQL • MySQL • Power BI • ETL • Star Schema • GitHub

- Built SQL ETL pipelines to collect, clean, validate, and transform 60,000+ business records into analytics-ready datasets.
- Designed a Star Schema data model to improve analytical reporting and SQL query performance.
- Optimized 100+ SQL queries using JOINS, GROUP BY, aggregations, and subqueries for KPI reporting and business analysis.
- Developed three interactive Power BI dashboards using DAX and Power Query to monitor KPIs, business trends, and operational metrics.

AI-Assisted Expense Behavior Analysis System January 2026 – Present

MySQL • Python • Django • AWS EC2 • Chart.js • Git • GitHub

- Designed a normalized MySQL database (3NF) with 5+ relational tables, foreign keys, indexing, and integrity constraints for expense tracking and financial analytics.
- Deployed a MySQL database on AWS EC2 and integrated it with a Django application for secure data storage and retrieval.
- Developed interactive dashboards using Chart.js to visualize spending trends, budget utilization, KPIs, and financial insights.
- Collaborated with a four-member team to document database schema, analytical workflows, and project deliverables using Git and GitHub.

EDUCATION

Parul University Expected May 2027

B.Tech – Computer Science Engineering (Artificial Intelligence)

CGPA: 7.7/10

CERTIFICATIONS

Cisco Networking Academy – Data Analytics Essentials Jul 2026

Wipro TalentNext – Data Science Program Expected Aug 2026

ACHIEVEMENTS

- Solved 150+ SQL and Python problems on LeetCode, strengthening problem-solving and SQL querying skills.
- Earned HackerRank Level 2 badges in SQL and Python.
